

MACA

Make Affordable California Again

No Personal Tax Increase

Protect families. Freeze taxes. Stop hidden increases.

MACA will protect California families by freezing state-controlled personal income tax increases, defending owner-occupied home property tax protections, and stopping higher personal DMV and vehicle fees during the Governor's term.

- 1. Freeze personal income tax rates.** MACA will veto any bill that raises California personal income tax rates on families, workers, retirees, or small household earners during the Governor's term.
- 2. Protect family credits and deductions.** MACA will oppose hidden tax hikes that reduce family credits, deductions, exemptions, or filing protections in a way that makes households pay more.
- 3. Defend owner-occupied home property tax protections.** MACA will protect family homeowners by opposing any state action that weakens homeowner protections, raises assessment pressure, or increases property taxes on personal residences.
- 4. Stop personal DMV fee increases.** MACA will veto increases to ordinary household vehicle costs, including registration charges, license and identification fees, title and transfer fees, and other personal DMV charges.
- 5. Block taxes disguised as fees.** MACA will reject new surcharges, assessments, or renamed fees that raise the cost of living for families while avoiding the plain language of a tax increase.
- 6. Require a family tax impact review.** MACA will require every proposed tax, fee, or assessment change to disclose its estimated impact on working families, homeowners, drivers, and retirees before approval.
- 7. Publish a public no-tax-increase report.** MACA will issue a regular public report showing every tax and fee proposal reviewed, vetoed, opposed, or blocked so Californians can judge the pledge by facts, not slogans.
